

Annual Educational Program Results for

First-time COPR Entry to Practice Examination Candidates

This chart displays pass rates for the five Advanced Care Paramedic (ACP) examinations administered in 2025. Annual pass rates include all first-time ACP examination candidates from Canadian educational institutions. The national examination total includes all first-time candidates, whereas the chart displays only those institutions or campuses with six or more candidates*.

COPR reports institutional or campus-level data in accordance with educational institution requests; as a result, some institutions are reported as a single entity rather than broken down by individual campus.

Advanced Care Paramedic		
National Average Pass Rate:	95%	
National Number of Candidates:	269	
Educational Institution	Number of Candidates	Pass Rate
College of the North Atlantic (St. John's)	7	100%
